Experience

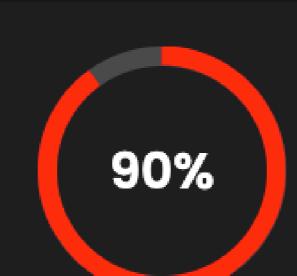

#### My Skills

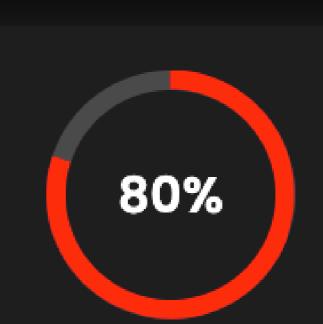

#### AI+IoT=AIoT

The Internet of Things: Reinvented - in bringing Artificial Intelligence, Internet of Things, and predictive analytics to your business.

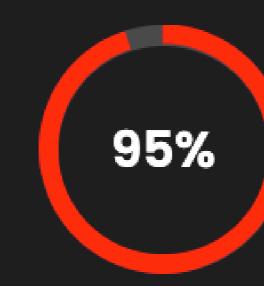

### DevOps

Got your build and deployment needs covered. Building and managing infrastructure for high-growth, high-traffic web properties and mobile apps.

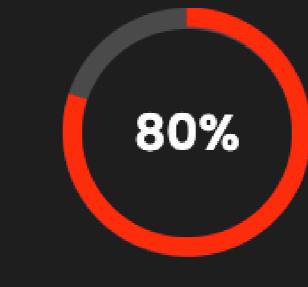

#### Web Development

A full stack web developer who loves to code and make the most beautiful and functional websites & Webapps possible. I code, therefore I am.

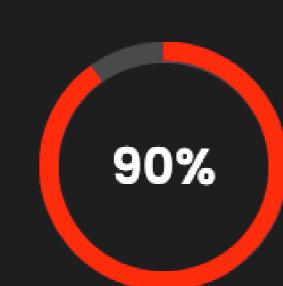

#### Innovation

I believe in the power of creative problem solving. I work with small business owners to implement strategic tech and business development plans.

#### **Hybrid Apps**

I believe the best mobile app is the one you never knew you needed. We're a mobile app that brings together the best of the web and the world to your fingertips.

#### **Tech Writing**

Love Writing & Technology. I help people understand complicated technologies so they can make the right decisions in their tech writings.
